About Us

UniDoc Health Corp is an eHealth innovator and the creator of the H3 Health Cube, a self-contained virtual clinic that allows patients to have comprehensive medical appointments remotely.

We're building a global network of virtual care solutions that deliver comprehensive medical services anywhere they're needed.

Improving the Patient/Doctor Relationship

UniDoc Brings Doctors and Patients Closer Together

Care providers are used to treating and seeing patients in person, through its telehealth virtual clinic solutions. UniDoc can actually improve the doctor-patient relationship by eliminating commuting and scheduling impediments and offering the same ease and familiarity as face-to-face patient interactions.

UniDoc's Telehealth systems can actually increase the rate of communication between doctors and their patients so that both parties can access the information they need when they need it most.

Preserving the Doctor-Patient Relationship.

The UniDoc platform is designed to replicate the in-person experience. Doctors receive all the diagnostic readings from the medical devices as well as clearly see and hear their patients during the virtual consultation to properly diagnose their symptoms with the same accuracy as an in-person visit.

Smart Health Clinic

Deliver convenient, high-quality virtual care at a point of service closest to patients' residences.

Care Closer to Home

Bring virtual healthcare to communities so patients can receive care conveniently near their residences.

Real-Time Clinical Access

Enable physicians to extend their reach beyond clinic walls with secure, real-time access to patients' clinical data and vital signs.

Lower-Cost Point of Service

Empower organizations to deploy a low-cost virtual care solution without the cost and complexity of recruiting in-house physicians.

UniDoc Health Connect Platform

A scalable, turnkey telehealth service and off-the-shelf white label platform. Communicate in 130 languages and with people with health conditions or impairments.

Virtual Consultations

Secure, real-time video visits for high-quality patient care.

Multilingual Communication

Connect in 130 languages and support people with health conditions or impairments.

Electronic Medical Records

Manage patient data, visit history, and clinical records securely and efficiently.

Documentation & Billing

Complete documentation, coding, and billing in one integrated telehealth platform.

- ✔ Supports all vital components of a telehealth program including:
 - ✔ Patient intake and scheduling
 - ✔ Virtual consultations
 - ✔ Electronic medical records management
 - ✔ Provider consult documentation and visit coding
 - ✔ Patient billing and payment processing

UDOC-2022GP-A

Includes:

- ✓ USB Electronic Stethoscope
- ✓ Versa Scope
- ✓ All-in-One Vital Signs Monitor with SpO₂, BP, pulse rate, temperature
- ✓ IT & communication equipment, software, licenses

Tests Available from Blood Samples

- HbA_{1c}
- CRP
- Lipids Panel
- Blood Glucose
- Blood Creatinine PT/INR

Tests Available from Urine Samples

- Urine Creatinine
- Urine Albumin

Capillary Blood Analyzer

A point-of-care (PoC) analyzer that features a clinically important menu of 10 measured and individually selectable tests, in addition to 7 calculated tests. All tests are measured with disposable, ready-to-use cartridges or test strips, and are easily performed by non-technical personnel using a very small capillary blood drop for all blood tests.

ECG/EKG

Touch-ECG System - Android configuration. Comfortable, lightweight, wireless and fully diagnostic 12 lead ECG acquisition unit.

Deployment Flexibility

UniDoc deploys across six purpose-built form factors — from full walk-in clinics to backpack-portable diagnostics for the most demanding field environments.

Remote Community

Full Clinic H3 Cube

Self-contained virtual clinic with certified diagnostics and physician access anywhere.

Pharmacy / Workplace

TeleHealth Kiosk

Virtual healthcare in pharmacies, workplaces, and community centers.

Hospital / Bedside

Clinical Assist Cart

Tablet-based bedside solution with vitals monitoring and video collaboration.

Remote Diagnostics

Compact TeleClinic Case

Mobile diagnostic unit integrated medical devices and secure data exchange.

Military / Disaster Relief

TeleClinic Backpack

Mobile diagnostics for backpack, ATV, shipboard, and airborne deployments.

Primary Care / Screening

Patient Assessment Terminal

Space-efficient station with diagnostics, ECG, ultrasound, and HD video.

UniDoc

H3 Health Cube / Kiosk

H3 Health Cube complete with self-sanitation solution, lighting, exterior security system, medical chair, fold down bed, cabinet accessories with all electrical components for complete deployment and installation.

IT & Communication

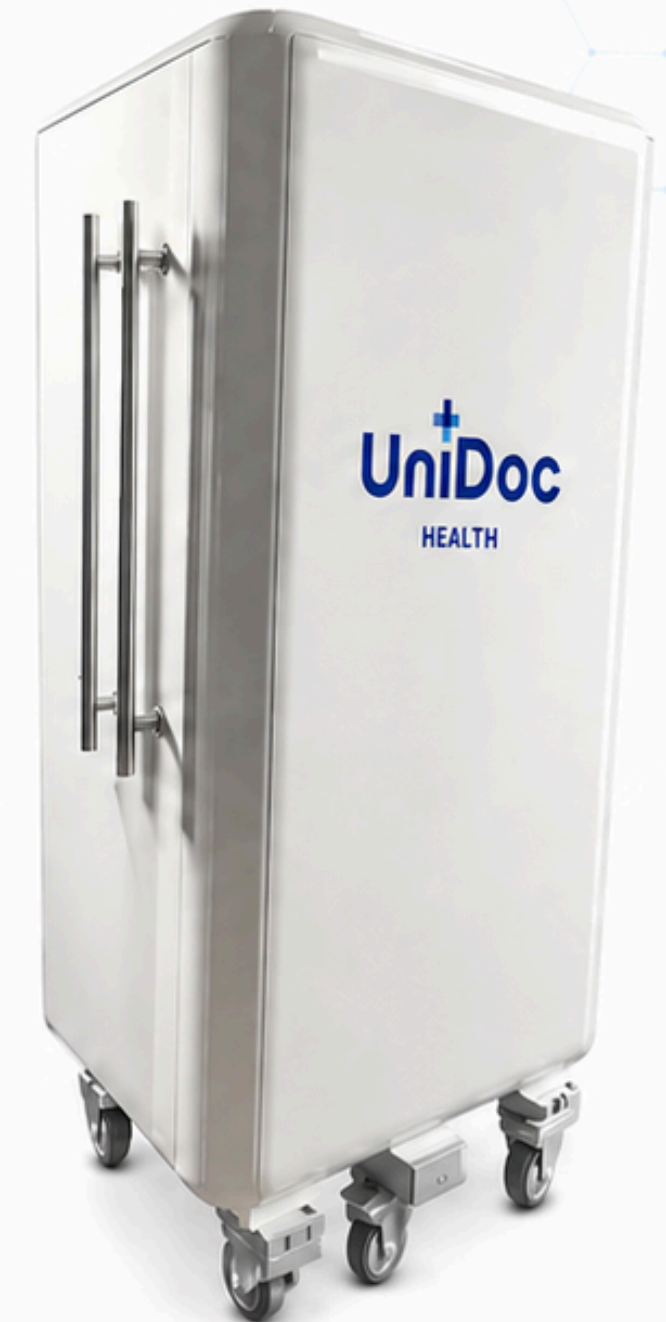

- Complete with local PC/Server
- Industrial 360° Web Cam
- Switches, power supplies and router
- Monitors, keyboards
- Printers and scanner
- Modem

Medical Equipment

- USB Electronic Stethoscope
- Versa Scope
- All-in-One Vital Signs Monitor with: S pulse rate, temperature
- Electronic Scale
- Touch-ECG System wireless, fully diagnostic 12 lead ECG
- TD-426 Blood and Urine – Rapid Test Monitoring

Licenses

- AGNES connect device communication interface platform
- HIPAA compliant scheduling and appointment platform
- HIPAA cloud storage
- EMR/EHR integration platform
- HL7, FHIR, API and other integration protocols
- Complete enterprise customizable platform

Compliance and Regulations

All medical devices are FDA, Health Canada, and European Union approved and registered.

Quality Best Practices

FDA Certified • ISO 13485 • FDA GMP

Universal HL7 and EMR Filing

Seamlessly export patient session information to a single HL7, FHIR-based file.

The HL7 module simplifies integration with your organization's infrastructure by providing a file that interfaces easily with EMR systems.

Information is ready to be stored in the patient's record.

EHR Interoperability
Cloud-Based • Scalable • Customizable

Physical Examination Tests

Primary Care

Family Medicine, Internal Medicine, Pediatrician, OBYN and Internal Medicine–Pediatric Doctors

- Pulse Oximetry
- Blood Pressure
- Temperature
- Measurements
- Oxygen

Examinations

Ear | Nose | Throat | Heart | Lung

Physical Examination Tests

Secondary Care

Cardiologists, Vascular Interventionists, Gastroenterologist, Ophthalmologist, Dentist.

- EKG – Cardiology
- Stroke Volume, Cardiac Output, Cardiac Power Index, Total Peripheral Resistance, Left Ventricle Systolic Function and Total Body Water

Examinations

Cervix, vulva, vagina | Horus Scope Vascular Ultrasound |
Ultrasound/OB/GYN | Abdominal Ultrasound | Dental Camera

Physical Examination Tests

Specialist Tests (Future Development)

- Non Midriatic Retina Camera
- Blood Analysis
- Urine Tests
- Dialysis
- X-rays
- CT scan
- Digital Video
- Colposcope

Why UniDoc

Beyond Video Calls – Real Clinical Care

	Typical Telehealth	UniDoc Platform
Clinical capability	Video only	Video + full diagnostics
Device integration	None or limited	FDA-certified device interoperability
EMR connectivity	Manual data entry	Native HL7 / FHIR integration
Environments served	Internet-connected only	Air-gapped, rural, field-deployable
Data security	Stored PHI risk	Zero-PHI – data deleted at visit end
Regulatory fit	Consumer-grade	FDA cleared, HIPAA, ISO 27001, CE Mark

UniDoc is a clinical integration platform - not a telehealth app. It unifies secure video, health information systems, and connected medical devices into a single, extensible care environment that works anywhere.

Our Partners

UniDoc works with internationally recognized companies across distribution, connectivity, security, hardware, and telehealth to deliver a certified, interoperable healthcare ecosystem.

Global Distribution

Global distribution network ensuring certified, on-time delivery to government and enterprise customers in 100+ countries.

Connectivity, Security & Hardware

Secure, enterprise-grade connectivity for all remote and mobile deployments.

Medical-grade hardware certified for clinical environments worldwide.

Intel-powered edge computing enabling offline-capable diagnostics.

Telehealth Network Partners

Physician network providing on-demand virtual care across North America.

Chronic disease management and specialist services.

Single-source telehealth connecting patients to verified providers.
